

### Do you ever lie in bed wishing you could fall asleep?

Imagine a world where you could sleep AS EASY as the push of a button... soundly and without using dangerous sleeping pills. My name is Ben Yu, I used to drop out of Harvard to invent Sprayable, I had no clue what this world was like.

I remember countless nights lying awake at night, eagerly checking the clock to see how many hours I could still salvage. This led to anxiety, frustration, and even less sleep. You're Probably Sleep Deprived (and it's dangerous).

- Do these symptoms sound familiar?
• Low energy throughout the day
• Slowing food cravings (especially carbohydrate cravings) even when you're not hungry
• Irritability/Anxiety
• Stress and stress-related weight gain

This can lead to problems such as: Depression, Heart Disease, High Blood Pressure, and Obesity.

The health consequences are so dire that I even thought about using sleeping pills. But even pills won't improve your health... studies have shown that 30% of people who take pills die from heart disease.

There was nothing else to do there, so I decided to make this a reality. Instead with a \$100,000 investment from Peter Dinklage, to find my way forward in Berkeley's (expensive) city of innovation and venture capital, the solution fell into my hands.

Fortunately, I studied biochemistry at Harvard and am from a family of PhDs so that same subject matter with this world's backbone in the world's leading research center to avoid continuous hours of work here, we developed a solution. Was it the solution I imagined? No, it was even BETTER.

Sprayable Sleep is the world's first natural, all-natural, safe spray... which helps you get to sleep when you need it - without harsh, addictive chemicals, or ineffective prescription pills.

Sprayable Sleep is a product you can use to get to sleep about an hour before you need to get to sleep. It's natural, effective, and most importantly, SAFE.

- Sprayable Sleep helps you:
• Fall asleep faster, safely
• Without the sleep progression that comes with sleeping pills...
• All night, even if you wake up

"Sprayable Sleep changed my life"
For decades I had a fear of insomnia... I just had those terrible falling asleep... I hear modern sleeping centers and the fact that some people depend on sleeping pills to get to sleep. I was not alone.

Thank you, Sprayable Sleep, for changing my life.

A Better Sleep is Only A Click Away

To make things worse, some people make these DEADLY mistakes...

Many people have been sleeping pills. They don't realize that they actually increase one risk of death by nearly 50%.

And "safe" and "natural" solutions, such as taking pills of sleep medicines? Are they safe? Not so much.

They actually send your brain into overdrive, bombarding your body with an unrelenting amount of chemicals that...

This is why we spent TWO YEARS to invent Sprayable Sleep

It makes falling asleep as easy as pushing a button

Sprayable Sleep is the world's first natural, all-natural, safe spray... which helps you get to sleep when you need it - without harsh, addictive chemicals, or ineffective prescription pills.

Inventing Sprayable Sleep wasn't easy. It took 2 years and one of the world's TOP FIVE labs to even work it.

But it was worth it, because we came up with the safest, most effective, and SWEETEST way to fall asleep.

Unlike pills, Sprayable Sleep works through your skin, right before it gets into your brain. It releases the stress hormones that your body gets to help you fall asleep, and that's all it does. It's NATURAL and DEADLY, because of the hormones that take 20 years to build.

Using Sprayable Sleep is so easy and so effective...

Just spray it before you go to bed, before you go to sleep. You can adjust how often you spray over time. You may find that 1 spray every night is just what you need for a better night's sleep.

We're only happy when you're happy
